#### **HYDROCHLORIC ACID, SOLUTION UN 1789**

Note: Most foams will react with the material and release corrosive/toxic gases. SMALL FIRES: CO<sub>2</sub> (except for Cyanides), dry chemical, dry sand, alcohol-resistant foam. LARGE FIRES: Water spray, fog or alcohol-resistant foam. Move containers from fire area if you can do it without risk. Use water spray or fog; do not use straight streams. Dike fire control water for later disposal; do not scatter the material. FIRE INVOLVING TANKS OR CAR/TRAILER LOADS: Fight fire from maximum distance or use unmanned hose holders or monitor nozzles. Do not get water inside containers. Cool containers with flooding quantities of water until well after fire is out. Withdraw immediately in case of rising sound from venting safety devices or discoloration of tank. ALWAYS stay away from tanks engulfed in fire. (DOT, 2000)

Special Hazards of Combustion Products: Toxic and irritating vapors are generated when heated. (USCG, 1999)  
Inhalation of fumes results in coughing and choking sensation, and irritation of nose and lungs. Liquid causes burns. (USCG, 1999)

### **G.13. Empresa Miratex.**

En visita realizada a la industria se pudo determinar que en esa planta solamente se realizan procesos relacionados con el hilado de fibras sintéticas y textiles, en la planta no se realizan almacenamientos de sustancias químicas, no cuenta con sistemas de generación de calor (Calderas) y no realiza procesos de teñido, por lo tanto no se puede realizar ningún tipo de simulación con los elementos que esta empresa maneja.

### **G.14. Empresa Pintubler.**

Los productos con el mayor potencial de peligro, que maneja esta empresa, son el Varsol y la Resina ((RESIN SOLUTION, UN 1866), el producto que puede representar estas dos sustancias (40 ton), para modelar el peor caso en ALOHA es el Etanol.

### G.23. Empresa Transporte Trial

En visita realizada a la empresa se pudo determinar que la operación de la misma es solamente la coordinación de procesos relacionados con el transporte de mercancías.

En el lugar que se visitó solamente funcionan oficinas administrativas y por lo tanto no se realizan almacenamientos de sustancias químicas, se realiza transporte variado de mercancías, en la mayoría de los servicios no se transportan sustancias peligrosas.

En este aspecto los vehículos recogen el material en las instalaciones del cliente y lo conducen hasta el destino, sin contar con almacenamientos temporales del mismo.

Para esta empresa no se realiza ningún tipo de simulación
